

How to Ask a Better Question

A short guide to getting more from your reading

Rukiyah | The Rich Witch

Why Your Question Matters

A reading can only work with what you bring into it. A vague question gets a vague reading. A real, specific question gets you something you can actually use. This guide will help you get there before your next reading — or the next time you're stuck on a decision, cards or not.

Three Ways Questions Go Vague

1. Too broad

"What's going to happen with my life?"

Fix: pick one situation. A reading works best on one thing at a time.

2. Too passive

"Will things get better?"

Fix: name what "better" actually means to you. Better how, exactly?

3. About someone else's outcome

"What is [someone] thinking or feeling?"

Fix: ask about your part in the situation, not someone else's mind. That's what you can actually act on.

A Simple Way to Build Your Question

Three things to name before your reading:

- 1. The situation.** What's actually going on, in a sentence or two?
- 2. What you want to understand.** What do you need clarity on, specifically?
- 3. Your timeframe, if it matters.** Right now? This season? Before a decision you're facing?

Examples: Before → After

Relationships

"Does he love me?"

"What do I need to understand about where this relationship stands right now?"

Work

"Will I get the promotion?"

"What do I need to understand about my next move at work?"

Decisions

"Should I move?"

"What do I need to see clearly before I decide whether to move?"

What You're Actually Getting

A reading helps you see what's actually happening in a situation, so you know what to do next. I read traditional playing cards, not tarot.

Before Your Reading: Quick Checklist

- ✓ Write your question down before we begin.
- ✓ Keep it about your part in the situation.
- ✓ One focused question for a Single Question reading. A wider situation for a Full Spread.

Ready to bring your question in?

Single Question — \$45 / 20 minutes

Full Spread — \$100 / 45 minutes
